

Notes on Homework Assignments

Submitting, Reviewing, Grading

Submitting Assignments: Timeline

- Tuesday, Week 1
 - Assignment is made
- Monday, 12:00 midnight, Week 1
 - Assignment is due
 - Submit through Canvas
- Tuesday, 12:00 noon, Week 2
 - Peer review assignments are made
- Wednesday, 12:00 noon, Week 2
 - You must make an initial review of both assignments
 - Use GitHub Issues
 - Failure to do this will cost you 0.5 points
- Monday, 12:00 midnight, Week 2
 - Peer review approve/disapprove complete: use Canvas
 - Code submission: Update Canvas

What and How to Submit Your Project

- Submit a link to your Wiki
- Each assignment should have a separate Wiki entry
- The Wiki should contain everything needed to review and grade the assignment
 - Instructions on which branch or folder
 - How to build and deploy
 - How to test and run
- As required, the Wiki may also have other information
 - Designs, performance test results, etc.

Project Grading

- Your project submission is worth 8 points
 - You get all points if the grader (Sneha, Eldho, Ameya) can install and run your code.
- You lose points if
 - You don't submit the initial assignment on time to Canvas after 1st week (1 point)
 - You don't submit your final assignment on time to Canvas at the end of the 2nd week (1 point)
 - You don't have at least one "approve" by a peer reviewer (1 point)
 - The grader can't evaluate your assignment based on your Wiki documentation (1 point for each time the assignment is returned).
- We may deduct other points if we see other behavior that needs correction.
 - For example, peers consistently can't get your codes to work at all or identify that you have done incomplete work.
 - You will be warned first.

Peer Grading

- Each project that you peer-review is worth 1 point
 - 2 points total
- Use GitHub Issues for communications, bug reports, etc.
- You get 0.5 points for completing your first peer review by Wednesday noon of the second week.
 - Submit your summary to Canvas.
- You get 0.5 points for submitting your final evaluation of the project (approve/disapprove) by midnight Monday of the second week.
 - Submit your summary and approve/disapprove through Canvas.
- You may lose points if you approve projects that the grader can't grade.
 - We will warn first.
